Also Available

MM-901	Magic Metallic Assortment Kit
MM-902	Magic Metallic Sampler Kit
MM-905	Magic Metallic Metallic Kit

Magic Metallics Product Line

Magic Metallics are finely ground metal particles suspended in an acrylic base. They can be applied to any surface to create a real metal finish. Metal finishes include Gold, Steel, Bronze, Dark Bronze, Copper and Aluminum.

The "magic" in Magic Metallics is in their ability to be oxidized – steel finishes can be made to rust while copper, gold, and the bronze products can be made to patina – just as these metals would do if exposed to moisture in nature (Aluminum does not rust or patina naturally). Our patina and rusting agents can create rust and patina effects in as little as 30 minutes.

You can apply Magic Metallics as you would any other acrylic paint to any surface. Use brushes, sponges, stamps and anything else you can think of to create interesting effects (Rust and Patina agents can also be spray applied). Magic Metallics can be applied to any craft surface, ceramics, wood, paper, glass, Styrofoam, plastic, fabric – literally any surface can be "metalized" with Magic Metallics.

Magic Metallics do not use solvent-based formulas – all product are non-toxic. They easily clean up with water and do not require protective clothing or special equipment during their use.

Bisque

Glass

Paper

Styrofoam & Wood

A New Dimension for Art Projects

Magic Metallics provides artists, designers and decorators with design options they may not have due to budgetary or equipment restraints. A Styrofoam sculpture can be turned into a bronze statue with Magic Metallics. Ordinary materials, such as papier mâché, polymer clay, and paper projects, are transformed into grand statements.

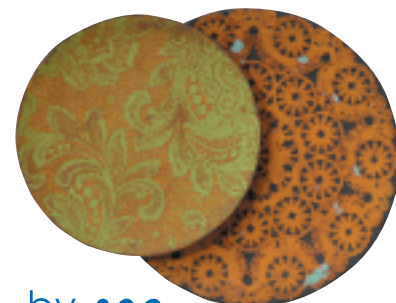

Schools: Applications include an art project creating an aged look; a science project discussing the chemical process of oxidation; a history lesson on Roman and Greek sculpture.

Artists: Use Magic metallics to create brilliant metallic finishes, a natural patina or authentic rust. Perfect for sculpted works, garden decorations or that unusual look for your home décor.

Designers: Faux finishers and home remodelers can use Magic Metallics to turn an entire wall into a metal surface or create unique accents in any room.
